WORK EXPERIENCE

EMSI

Full-Stack Developer — Internship

Casablanca, Morocco (Hybrid)

Apr 2026 — Jun 2026

TypeScript, Angular, Nest.js, Java, Socket.IO, PostgreSQL, DSA, Constraint Programming, Agile

- **Architected an end-to-end automated academic timetable generation system** — eliminating fully manual scheduling by designing the complete pipeline from data preparation and institutional constraint modeling through solver execution, history tracking, and final validation.
- **Applied advanced local search heuristics** (Hill Climbing, Great Deluge, conflict-based neighbor selection) to efficiently navigate large solution spaces, consistently producing high-quality, near-optimal timetables within tight feasibility bounds.
- **Engineered production-grade reliability** through layered feasibility checks, structured diagnostic reporting, intelligent fallback handling, and a human-review interface — ensuring stakeholder confidence and graceful recovery from edge cases.

PROJECTS

Olyx UI — Open-Source React Component Library

olyxui.com

React, TypeScript, Base UI, Native CSS, HCT Color System

- Architected and shipped 50+ WAI-ARIA compliant components on React's Base UI, with a zero-conflict native CSS architecture, HCT-based color tokens, and a hue-driven theming engine that auto-generates WCAG AA accessible palettes.

MindSprint — AI-Powered Developer Learning Platform

Dec 2024 — Mar 2025

React.js, Redux, Node.js, Express, TypeScript, MongoDB, MySQL, Redis, Docker, GitLab CI/CD, Figma, UML

- Built a full-stack learning platform with React, Redux, and Node.js featuring structured personalized paths and AI-based concept explanations that simplified validation and boosted engagement.
- Implemented a real-time team chat using Redis Pub/Sub and automated the entire deployment pipeline with Docker and GitLab CI/CD, significantly reducing setup and release time.
